

Bisque has a handy heat loss calculator on its website (bisque.co.uk). Simply enter your room and window dimensions and it will automatically give you the correct wattage needed.

Bisque Quill
 The latest model from Bisque is the Quill towel radiator, which features a stylish fluted design made from high quality polished stainless steel to create a sleek, modern finish. Available in six sizes, its elegantly proportioned tubes reflect the light, while at its apex sit unique, angled tips. The looping towel rail also has plenty of room to dry towels after use. It has a maximum output of 438W or 1494Btu/hr.
PRICE £820

up the room. 'The answer is to use dual fuel towel radiators supplied with supplementary electric heaters,' says Barbara Payne, Head of Product and Marketing at Bisque. 'By using a special T-piece, the valves and electric element can be installed on the same radiator so that it runs off the central heating in the winter and electricity in summer. The electric elements are specially sized to dry towels but not to heat the bathroom.' **EKBB**
