

MPS Radiators has introduced the Quadro to its collection of designer towel rails. Available in two sizes - 1,116mm x 300mm and 1,828mm x 300mm - it is available in hydronic and electric only options, with a heat output range from 528 to 215 watts. Colours range from Pearl White and Sunstone to Strawberry Red and Pastel Blue.

**1.** VIVID IV (VNC221) is just one of the products from Vogue UK's new range of heated towel warmers; the Integral Collection. Each of the products feature a newly designed 'Integral' valve, which is completely unique. The hidden valve is built-in to the towel warmer design for a sleek, seamless appearance, yet still provides the same level of control as a visible, standard valve. The smallest model provides a heat output of 138 watts/471 Btu/hr.

**2.** Bisque's new Trubi radiator has been designed to be positioned either vertically or horizontally. Available in 12 sizes, including narrow designs measuring from 330mm x 1800mm to 462mm x 1800mm and wider designs ranging from 600mm x 792mm up to 1188mm. Customers can choose between a single or double tube design and a range of colours including White, Titane and Volcanic (pictured).

**3.** Goia's DEVImer electric under floor heating is ideal for use in bedrooms. Installed just below the floor tiles, heat can be transferred quickly to the surface. This means in warm weather, when heating is not required constantly, the wet room floor can still be dried quickly or the flick of a switch or on a timer setting using the DEVIreg timer and thermostat control.

## THE HEAT IS ON

The latest heating products on the market to get temperatures soaring

**2.** Bisque's new Trubi radiator has been designed to be positioned either vertically or horizontally. Available in 12 sizes, including narrow designs measuring from 330mm x 1800mm to 462mm x 1800mm and wider designs ranging from 600mm x 792mm up to 1188mm. Customers can choose between a single or double tube design and a range of colours including White, Titane and Volcanic (pictured).

seen 21st century heating solutions now being manufactured with technology to allow homeowners to control the heat output much more precisely to suit individual preferences and life styles.

"Features such as concealed valves, adjustable fixings or built-in thermostatic controls for practical placement and maximum user convenience, continue to gain momentum in the heating market. Bespoke design has allowed manufacturers to tailor-make a designer radiator or towel rail to specific user and space requirements; such as a strategically placed thermostatic valve that can remotely control a radiator up to five metres away."

### What are your predictions for the market going forward?

"Stainless steel and brass remain two fundamental materials for the design of superior heating solutions. Incredibly versatile and most importantly, durable, such material is suitable for connection to both open and closed heating circuits only adding to the growth and popularity of brass and stainless steel towel rail and radiator models."
